

Natural Stone **Made Simple**

TIER Multipack Range

TIER Multipack is our dedicated Merchant range. This range is an all in one box solution and has a single component. The panels within this range are made in three sizes. Every panel has 'dressed' edges, so can interlock to form corners. TIER Multipack is available in six colours.

TIER Multipack Panel Dimensions

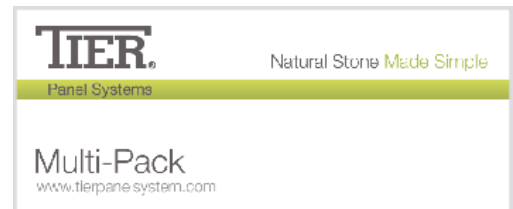

Each box contains 0.33 m². A box of Multipack contains 4 panels in the following quantities:

2 x Large Panels (517 x 215 mm)

1 x Medium Panel (317 x 215 mm)

1 Small Panel (200 x 215 mm)

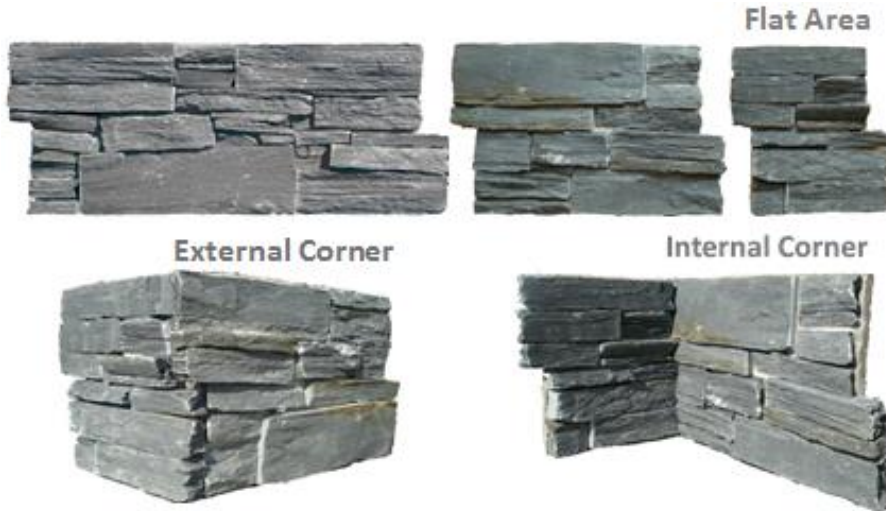

Colours Available

- Black Slate
- Multicolour
- Quartz
- Rustic Granite
- Thin Slate
- Nordic

Natural Stone **Made Simple**

Multipack Panels, interlock together on a flat surface, or interlock at 90 degrees to form external or internal corners.

TIER Multipack Range – Features and Benefits.

As this range is sold solely through merchant customers, there will be features which will benefit their customer and features which will benefit them.

For the customer/end user

- Natural real stone Gives an authentic and beautiful dry stone wall.
- Simplicity of fitting Cost saving. Modular system, no specialist trades.
- Speed of fit Saving on labour and scaffolding costs. Also accelerates build time.
- Self-supporting Cost saving. No expensive extra wide foundations.
- Thin Cost and space saving. No need for expensive 'special' extra wide sills and lintels. Can create more than half a metre of useful living space.
- Little waste Save money on non-useful material (up to 25%).
- Price Cost saving. A fraction of the cost of 'traditionally built' stone walls.
- Six colour options A stone choice to complement any project.

TIER Multipack Range – Features and Benefits.

For the merchant

- Innovative product Opens up new markets and offers something new to existing markets.
- Endless applications Suitable for trade, Self-Build, Gardens, DIY etc.
- Easy to stock Two components, Multipack and adhesive. Small stocking footprint as compact crates can be stacked 3 high. Boxed in manageable quantities and weights.
- Versatile design Means no time consuming calculations for sales/counter staff. No knowledge of the project is necessary. The customer simply supplies the size of the area.
- Good margin product High end product. Extra profit contribution.
- No large stock commitments Frees up space and cash flow.
- In stock Get product when you need it.

Pallet and Product Weights

Multipack Panel – Full Crate – contains 10.56m² (32 boxes) and weights approx. 880kg

Multipack Panel – Per m² – Weighs approx. 80-85kg when fitted.

Working out Quantities

Unlike our ‘Standard’ system, there is no requirement to work out liner metres of corners etc. Simply work out the area which needs covered, remembering window and door reveals, and divide by the box quantity of 0.33, and work into crates quantities. We do not price builders or end users etc. for Multipack, as all multipack orders go through a merchant, preferably a TIER Stockist. Haulage has been ‘built into’ the m² price of multipack, so when pricing a delivery Multipack should be sold in full crates (32 boxes).
